Education

Indian Institute of Information Technology, Dharwad

B.Tech in Electronics and Communication Engineering [CGPA : 8.67]

Jul. 2021 – Jul. 2025

Hubli-Dharwad, Karnataka

Experience

Needl.ai

Aug 2025 – Present

Software Engineer, Platforms Team

Bangalore, Karnataka

- Architected and scaled distributed **public crawlers**, **LLM-based scraping pipelines**, and **custom spiders with robust proxy integration** for reliable, geo-distributed web data extraction.
- Engineered high-throughput **ingestors and transformation pipelines** for efficient data indexing, normalization, and downstream data consumption.
- Strengthened **API reliability** by implementing **guardrails**, **schema validations**, **unit tests**, and **live API testing** to ensure data integrity and fault tolerance.
- Enhanced observability and operational stability by integrating **prometheus and opentelemetry for metrics**, tracing, and performance monitoring.

Needl.ai

Dec 2024 – July 2025

Software Engineer Intern, Platforms Team

Bangalore, Karnataka

- Contributed to **crawlers and data transformation pipelines**, improving extraction accuracy and pipeline efficiency.
- **Data migrations and one-time patch scripts** to support production data fixes and indexing improvements.

Fleeter

July 2024 – August 2024

Software Development Engineer Intern

Remote

- Worked on robust **backend systems for Client and Partner Portals**, improving operational efficiency.
- Migrated landing page to **NextJS** to enhance **SEO** and overall user experience.
- Integrated **CMS tools**, streamlining client management workflows.

Projects

Pulse Bengaluru  | Python, FastAPI, Flask, Firebase, Google Gemini

- Developed an **urban monitoring platform** with **real-time reporting system** using **FastAPI** backend and **Firestore Realtime Database**, enabling citizens to **submit geo-tagged incident** reports with media attachments.
- Engineered a **multi-source data aggregation pipeline** that processes information from **traffic news**, **social media reports**, and **local news articles using crawlers** to generate actionable insights for residents.
- Developed intelligent **PULSE** and **FORCAST Agents** using **Gemini** to analyze cross-platform data, generate **contextualized alerts** for 8+ categories of urban incidents.

Agentic AI Automation Agent  | FastAPI, LangChain, Gemini, OAuth2, Gmail API, Tavily, Hunter.io

- Designed a modular **agentic AI orchestration framework** enabling autonomous multi-step workflow execution , integrating **Gmail**, **Web search** and **Hunter API** to search professional emails
- Built a resilient **LLM routing and reasoning pipeline** with **dynamic prompt orchestration**, automated model failover, **adaptive tool selection** to maintain high availability during rate limits and external service failures.
- Implemented secure **OAuth2 lifecycle management**, intelligent **email automation** with dynamic MIME generation, **attachment handling**, and **real-time professional signature injection**, enabling personalized outreach workflow

Technical Skills

- Proficient in C, C++, Python programming with Data structures algorithms and OOPS.
- Strong foundation in Operating Systems and Database Management Systems.
- Backend Technologies: Flask, Node-Js, Express, Postgres, MongoDB
- Tools : AWS , Docker , Kubernetes , Postman , Copilot , MCPs

Achievements

- Selected for **onsite round of Google Agentic AI Day Hackathon** from **9000+** teams.
- **Open Source Contributor in SSOC** (Social Summer of Code-2022) organized by Social Foundation.
- **Solved 350+ DSA Questions** on Leetcode platform.
- **Problem Setter** in Technical Team of Coding Club at IIIT Dharwad
